“Boytorun Chemical Industry Inc. Creative and Innovative Construction Chemicals”

Boytorun Chemical Industry Inc. is one of the leading manufacturers of construction chemicals in Turkey and the world. We take pride in providing our customers with creative and innovative solutions. Our establishment took place in 1965, and we play a leading role in the Turkish and Middle Eastern markets. We manufacture products in compliance with ISO 9001 and ISO 14001 quality standards at our factory in Istanbul.

Customer satisfaction is always our top priority. Through effective communication, high-quality products, and reliable service, we aim to exceed our customers' expectations. We are proud to demonstrate our reliability and have received numerous successful import appreciation certificates at national and international levels. With experience and expertise, we focus on continuous research and development activities to meet our customers' needs. By utilizing the latest technologies, we produce high-quality products and contribute to our customers' success.

To maintain our leadership position in the industry, we emphasize high-quality standards and an innovative approach. We strive to be competitive in the global market and add value to our customers. Embracing innovation and excellence, we are delighted to collaborate with our customers. We are here to provide you with the best solutions. We are eager to collaborate and contribute to our customers' success. As Boytorun Chemical Industry Inc., we will continue to progress by focusing on innovation and excellence.

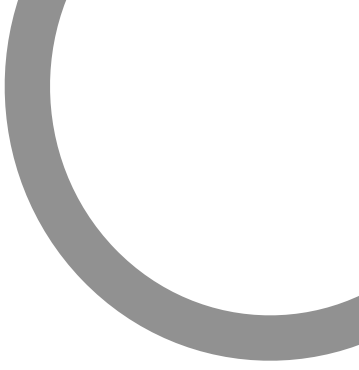

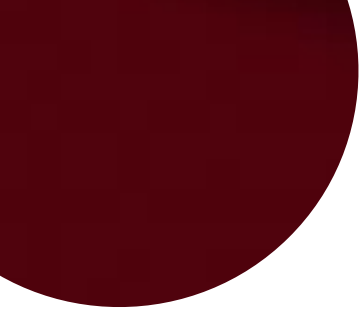

“We, as Boytorun Chemical Industry Inc., are here to provide you with the best solutions for your indoor and

The most important feature of our Boydur branded products is their rapid and reliable curing time, taking only 1 hour to achieve full strength. This allows you to obtain a long-lasting, durable, and reliable solution without interrupting traffic or workflow.

You will no longer have to deal with maintenance and waiting times for repairs. Our products offer you a quick solution, economically and without causing any material damage, providing you with a significant advantage. Regarding Boydur products, we can provide you with 100% support both in product selection and during the application process. Here are our advantages:

- It cures to full strength in just 1 hour.
- It can be used both indoors and outdoors with ease.
- It has flexibility and works in harmony with the flooring.
- It is easy to apply and renew.
- It is not affected by atmospheric conditions, chemical substances, or mechanical loads.
- It has a long lifespan and maintains its color and quality over the years.
- It is highly durable and has a strong structure.
- Specially manufactured according to the ambient temperature of the area.
- Supported by the experience of Boytorun Chemical Industry Inc.

We, Boytorun Chemical Industry Inc., are here to provide you with the best service for the solution of your flooring problems. We are delighted to assist you and make efforts to ensure successful results with our Boydur branded products.

Boytorun Kimya Sanayi A.Ş. offers a wide range of products in the field of construction chemicals. We provide solutions tailored to your needs to take your projects to the next level. The diversity and quality of our products support our leading position. Here are some of our products:

Road Marking Paints: Our high-quality paints used to ensure the safety of roads and traffic areas. They stand out with durability, visibility, and quick drying properties. They facilitate traffic flow and ensure clear and long-lasting markings.

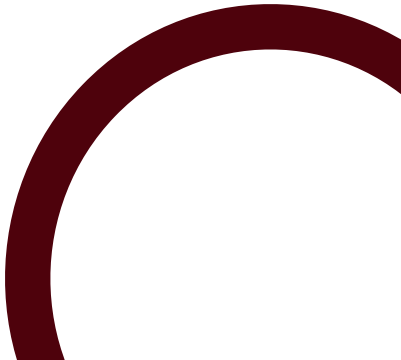

Floor Mortar Mixes: Our mortars designed to ensure smooth and durable floors. They repair potholes and imperfections, create a smooth surface, and contribute to the long lifespan of the floor. **Joint Fillers:** Our materials developed to fill joint gaps in floors and enhance stability. They offer high durability, flexibility, and fast drying. They seal cracks, prevent water leakage, and provide an aesthetic appearance.

Industrial Floor Coatings: Our products developed to provide durable and protective floor coatings in industrial areas. They exhibit high resistance against chemicals, abrasion, and heavy loads. They create a safe and hygienic working environment.

Surface Protection Products: Our coatings designed to ensure long-lasting and durable surfaces. They protect surfaces against environmental factors, chemicals, and wear. They prevent issues such as fading, cracking, or peeling of paints and coatings.

Methyl Methacrylate (MMA) Based Resins: As Boytorun Kimya Sanayi A.Ş., we are the sole Turkish producer of methyl methacrylate (MMA) based resins. These resins have a wide range of applications in construction material production and industrial applications. They are preferred in the industry due to their durability, fast curing, adhesive properties, and high chemical resistance.

At Boytorun Kimya Sanayi A.Ş., we offer you a wide range of products in the field of construction chemicals. We support your progress by providing solutions tailored to your projects. The diversity and quality of our products strengthen our leading position. We are here to provide you with the best service.

“Boytorun Kimya Sanayi A.Ş. products are successfully used in various industries:”

Industrial Areas: Our durable floor coatings and protective coatings are used in industrial areas such as factories, production facilities, warehouses, and logistics centers, providing high performance and safety.

Airports: You can choose our products to enhance the durability and safety of floors in high-traffic airports, runways, aprons, and terminals.

Ports, Piers, Shipyards: Our products used in the maritime sector provide resistant floors against seawater, salt air, and other environmental factors in ports, piers, and shipyards.

Military Areas: Our products used in military bases, facilities, and areas have features such as quick traffic access, security, and durability, supporting military operations.
Refineries, Gas Stations, Filling Facilities: In areas exposed to chemicals, fuels, and heavy usage, our products help protect and ensure the durability of floors.

Parking Lots: Our products offer effective solutions for creating durable floors in parking lots that are suitable for traffic.

Shopping Malls: Our products used in crowded shopping malls and stores preserve the durability and aesthetic appearance of floors.

Ship Decks: Our products used in marine vessels and ship decks provide resistant floors against seawater, impacts, and abrasion.

City and Highway Roads, Squares: You can choose our products to ensure the safety and durability of roads, sidewalks, and squares. We offer solutions that are resistant to traffic loads, quick drying, and long-lasting.

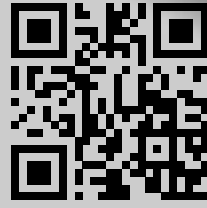

Bridges, Viaducts, Overpasses: Our products used in bridge, viaduct, and overpass floors that require high strength provide resistant coatings with abrasion and chemical resistance.

Trains, Metro, Rails, and Stations: Our products used in rail system floors provide durability against heavy passenger traffic, mechanical loads, and chemicals.
Hospitals: In hospitals where a hygienic and sterile environment is required, we offer floor coatings that are health-friendly, easy to clean, and durable.

Preservation of Historical Monuments: We help preserve historical buildings, monuments, and structures by providing long-lasting durability with our special formulations during restoration.

Construction of Buildings and Roads: Our products, which have a wide range of applications in the construction sector, provide effective solutions for the construction of new structures and the improvement of existing ones.

At Boytorun Kimya Sanayi A.Ş., we serve different sectors with our wide range of products and industry experience. We are here to contribute to the success of your projects by offering solutions that are tailored to your needs, high quality, and reliable. We look forward to providing you with the best service and collaborating with you.
