SECTOR CATALOG

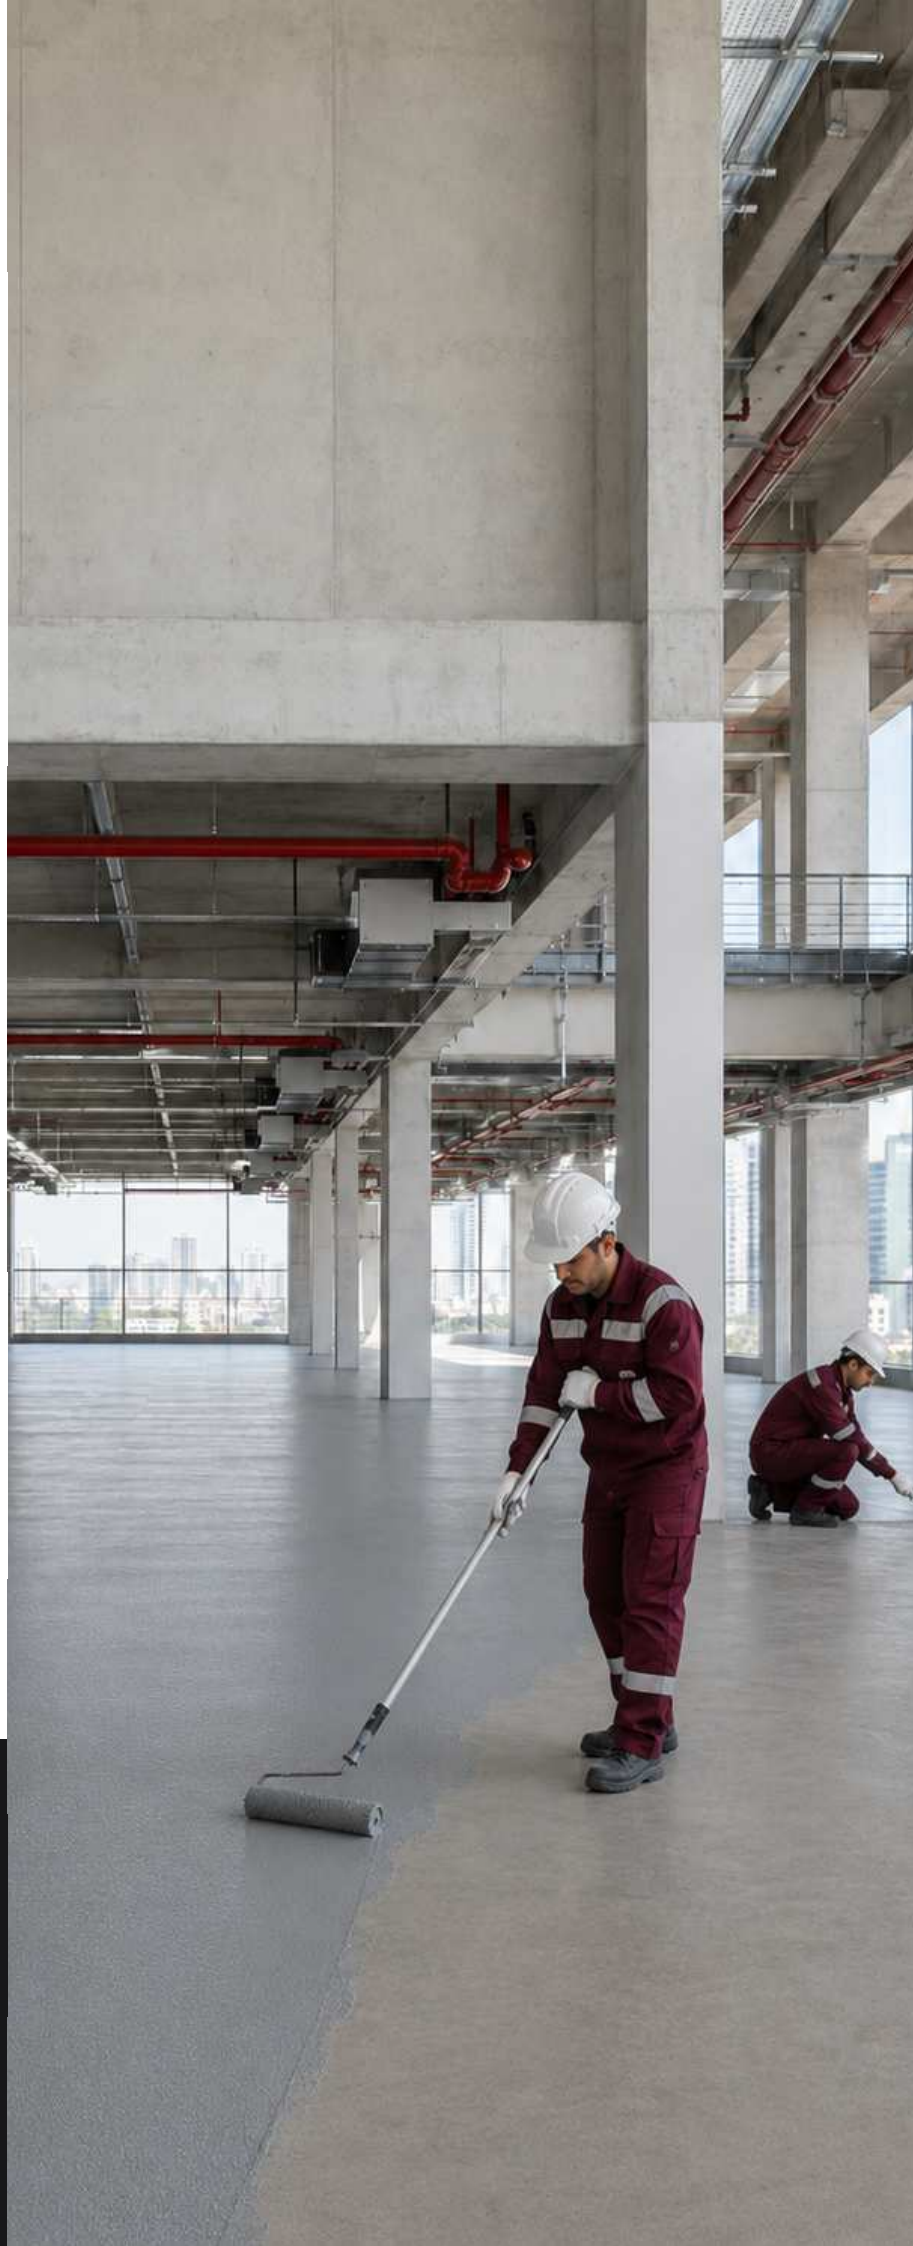

CONSTRUCTION FLOOR SOLUTIONS

Fast Application / Long Service Life

Fast, safe and durable flooring systems for building and construction projects.

BOYDUR® CONSTRUCTION SYSTEMS

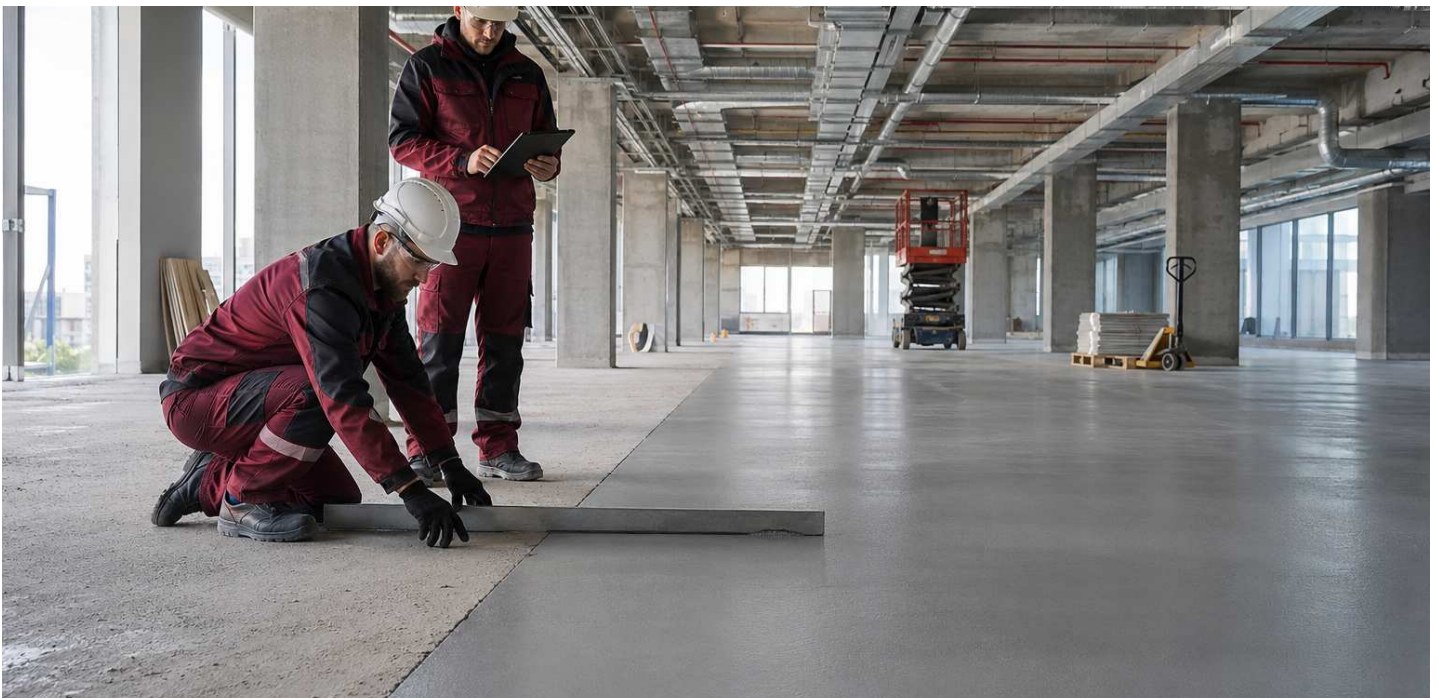

SINCE 1965

FOR CONSTRUCTION PROJECTS

THE RIGHT FLOOR. A STRONGER BUILD.

Floor damage, uneven surfaces and long curing times disrupt the programme. The right system supports rapid return to service, safe use and long-term durability.

01

RAPID RETURN TO SERVICE

Short application time helps protect the project schedule.

02

MECHANICAL DURABILITY

Selected according to load, traffic and abrasion conditions.

03

SAFE SURFACES

Slip-controlled texture supports safe use.

WHY BOYDUR®?

SPEED, DURABILITY AND SAFETY.

System selection considers the substrate, damage type, load, chemical exposure, indoor-outdoor conditions and the available application window.

01 FAST CURING

Technology designed to reduce waiting time in project and maintenance schedules.

02 STRONG BOND

High adhesion to concrete, metal and suitable building substrates with correct preparation.

03 MECHANICAL RESISTANCE

Systems designed for traffic, equipment, point loads and abrasion.

04 CHEMICAL RESISTANCE

Product selection based on oil, fuel and cleaning chemical exposure.

05 INDOOR AND OUTDOOR

An approach suited to UV, temperature change and operational conditions.

06 LIFE-CYCLE VALUE

Detailing intended to reduce repeat maintenance and unplanned closures.

RAPID FLOOR REPAIR MORTARS

REPAIR DAMAGE FAST.

Potholes, breaks and local concrete damage around columns, basements, ramps and technical areas are repaired with a system matched to the substrate and depth.

- Repair system selected by damage depth
- Solution suited to short application windows
- Controlled detailing aligned with floor level
- Structure resistant to load and abrasion

KEY PRODUCTS: BOYDUR® M12 / AKRIBETON / A20 FILLER / MALTARAPID PRO

RAPID ANCHORING MORTARS

SECURE THE ANCHORAGE.

For steel column bases, machine foundations and structural connections, the right system supports load transfer, void-free bearing and rapid installation.

- Solutions for columns and machine bases
- Controlled, void-free baseplate support
- High mechanical durability approach
- Rapid installation and commissioning

KEY PRODUCTS: BOYDUR® M12 / AKRIBETON

MMA-BASED FLOOR COATINGS

PROTECT THE SURFACE.

In basements, plant rooms, parking areas, storage and service zones, MMA coatings provide slip control, resistance, easy maintenance and rapid return to service.

- Controlled surface texture by operational use
- Selection for oil and chemical exposure
- System design for indoor and outdoor areas
- Solution suited to short application windows

KEY PRODUCTS: AKRIFLEKS / CK SERIES / AKRIMORTAR

RAPID FLOOR JOINT FILLERS

KEEP JOINTS UNDER CONTROL.

Open or weakened floor joints can accelerate water ingress and edge damage. The right filling system is designed to accommodate movement and protect integrity.

- Controlled filling matched to joint movement
- Selection for abrasion and chemical exposure
- Continuous application into the joint channel
- An approach intended to reduce repeat edge damage

KEY PRODUCTS: AKRIGUM / M12-A15-A125 / VIALIT REFUG

BY BUILDING ZONE

THE RIGHT FLOOR APPROACH FOR EVERY BUILDING ZONE

Basements and foundation levels

Parking areas and ramps

Technical rooms

Machine and lift rooms

Storage and service areas

Terraces and outdoor zones

Pedestrian routes

Columns and machine bases

Refurbishment and maintenance

ONE TECHNICAL APPROACH FROM SURFACE ASSESSMENT TO RETURN TO SERVICE

LET'S PLAN BUILDING FLOORS TOGETHER.

Site assessment, system selection and product consulting for construction projects.
