SECTOR CATALOG

RAIL SYSTEM SOLUTIONS

Train · Metro · Station · Maintenance Depot

Rapid repair, safety marking and heavy-duty flooring systems.

BOYDUR® · VIALIT · BETON ASFALTİ

SINCE 1965

CONTINUOUS SERVICE

CONTINUOUS AND SAFE TRANSPORT

In rail systems, floor and concrete damage directly affects passenger safety, visibility, maintenance time and line capacity.

01**SHORT CLOSURE**

Return maintenance areas to service in the shortest possible time.

02**HEAVY TRAFFIC**

Mechanical strength for passengers, service vehicles and equipment loads.

03**SLIP SAFETY**

Controlled, safe surface texture for platforms and pedestrian areas.

04**MOISTURE & CHEMICALS**

Resistance to water, oil, cleaning chemicals and environmental exposure.

APPLICATION AREAS

THE RIGHT SYSTEM FOR EVERY ZONE

- Passenger platforms
- Tunnel and passage floors
- Ticket halls and waiting areas
- Vehicle and service traffic areas
- Metro and train stations
- Under-rail concrete blocks
- Pedestrian and safety routes
- Maintenance depots and workshops

RIGHT PRODUCT GROUP

THE RIGHT SOLUTION FOR EACH NEED

01 RAPID CONCRETE REPAIR

Boydur® M12 and Akribeton for under-rail blocks, broken edges, potholes and heavy-duty repairs.

02 INDUSTRIAL FLOORING

Akrifleks, the CK range and Akrimortar for durable platform, station, depot and workshop surfaces.

03 JOINTS AND CRACKS

Akrigum, M12-A15/A125 and Vialit Refug for moving details and controlled filling.

04 ANCHORING AND FIXING

M12 and Akribeton for securing rail components, equipment, barriers and structural parts.

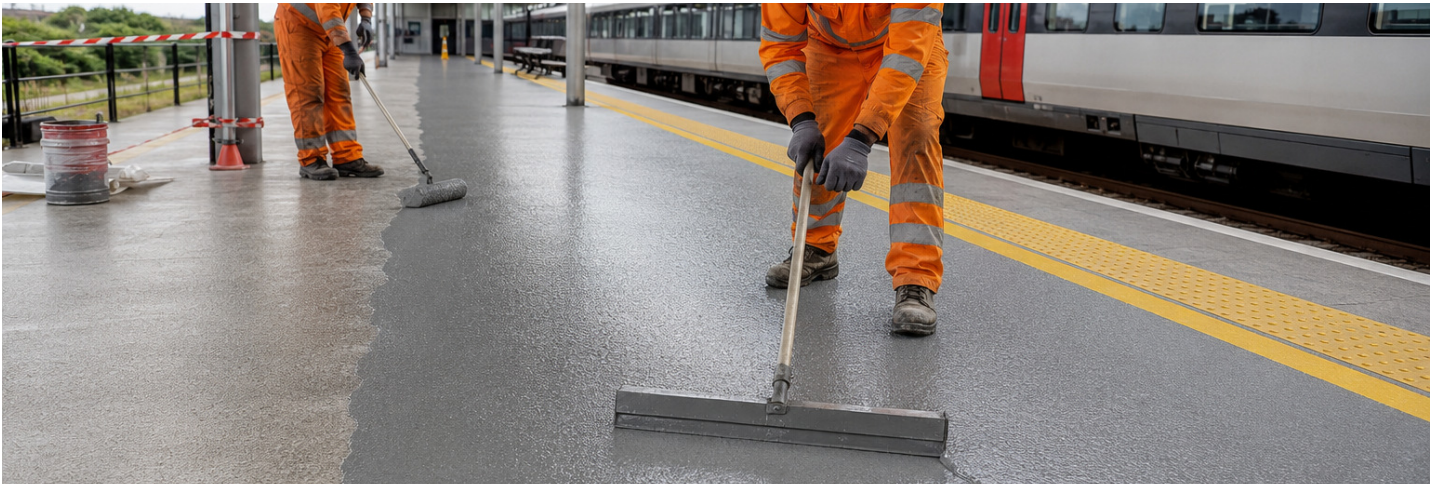

05 SAFETY MARKING

Marker 564 and Perfekt 564; rapid-curing, high-visibility MMA marking systems.

SINCE 1965

READY IN 1 HOUR. BUILT TO LAST.

We evaluate product selection together with substrate condition, traffic load, slip-resistance needs, chemical exposure and the available closure window.

01

RAPID CURING

Short waiting times with MMA systems help reduce operational downtime.

02

DURABLE SURFACE

The right build-up is defined for heavy traffic, abrasion and site conditions.

03

LOW MAINTENANCE

Correct detailing and product matching reduce repeat repairs.

04

SAFE APPLICATION

Slip resistance, visibility and site acceptance criteria are considered together.

ASSESSMENT · SYSTEM SELECTION · SAMPLE · APPLICATION CONTROL

LET'S SELECT THE RIGHT SYSTEM.

Technical assessment and product selection for train, metro, station and maintenance-depot projects.
